URBAN FOOD SYSTEM TRANSFORMATION: THE FIT4FOOD2030 CITY LABS

The video was FIT4FOOD2030's submission to the 2nd Citizen engagement Festival organised by the Joint Research Centre (JRC), the European Commission's science and knowledge service in Brussels on 9-10 December 2019.

FIT4FOOD2030 City Labs are hosted by science centres and museums, science shops and research organisations. They bring together several actors of the food system: citizens, industry, research, civil society.

The labs have the objective to build a community that understands and transforms the local food system. Their daily activities vary depending on the local context. In general, they focus on collaborative work, as well as broad and reflective learning.

FIT4FOOD2030 partners and City Labs collaborate and exchange the latest insights into food systems to shape a common vision of the food system, ready for the future.
